

## MANUAL FOR

Project : GMT-800 SKID CONVEYOR SYSTEM

Our Order Number : A30-276

Year of Manufacture : 1998

Customer : GENERAL MOTORS

Location : OSHAWA TRUCK ASSEMBLY

# SKID CONVEYOR SYSTEM ELECTRICAL MANUAL

## OSHAWA TRUCK ASSEMBLY

Manual Developed By:

Mark T. Wallace  
Richmond Hill, Ontario  
Canada

## TABLE OF CONTENTS

Section	Description	Page
LIST OF TABLES .....		iv
LIST OF FIGURES .....		vi
<b>SECTION 1 INTRODUCTION .....</b>		<b>1-1</b>
<b>SECTION 2 SAFETY.....</b>		<b>2-1</b>
<b>SECTION 3 CONVEYOR SYSTEM DESCRIPTION AND OPERATION .....</b>		<b>3-1</b>
3.1 CD Zone Sequence of Operation .....		3-1
3.2 DH Zone Sequence of Operation.....		3-1
3.3 HL Zone Sequence of Operation .....		3-2
3.4 LR Zone Sequence of Operation.....		3-3
3.5 M1E Zone Sequence of Operation.....		3-4
3.6 ER Zone Sequence of Operation.....		3-5
3.7 XX Zone Sequence of Operation.....		3-6
3.8 XE Zone Sequence of Operation .....		3-7
3.9 EX Zone Sequence of Operation .....		3-8
<b>SECTION 4 DETAILED CONVEYOR SEGMENTS' FUNCTION DESCRIPTION.....</b>		<b>4-1</b>
4.1 Accumulating Belt Conveyor .....		4-1
4.2 Cam Lift and Cross Belt .....		4-3
4.3 Destacker.....		4-6
4.4 Idle Roll Bed Conveyor .....		4-10
4.5 Load Transfer Conveyor .....		4-13
4.6 Scissors Lift .....		4-15
4.7 Stacker.....		4-17
4.8 Swing Table .....		4-21
4.9 Turn Table.....		4-24
4.10 Vertical Belt Lift.....		4-27
<b>SECTION 5 CONVEYOR SYSTEM ELECTRICAL DESCRIPTION ...</b>		<b>5-1</b>
5.1 Conveyor Control Components .....		5-1
5.1.1 Central Panel (CP) .....		5-2
5.1.2 Remote Panels (RP) .....		5-5
5.1.3 Drive Panels (DP) .....		5-5
5.1.4 Push Button Stations (PBS) .....		5-5
5.1.5 PanelView Stations (PVS) .....		5-8
5.1.6 Bar Code Readers .....		5-8
5.2 Control Zones.....		5-8
5.3 Power Distribution Overview .....		5-8
5.4 PLC Communication Networks Overview .....		5-12

## Table of Contents (Continued)

Section	Description	Page
<b>SECTION 5 CONVEYOR SYSTEM ELECTRICAL DESCRIPTION (Continued).....</b>		
5.4.1	Remote I/O.....	5-12
5.4.2	Data Highway Plus .....	5-12
5.4.3	Ethernet .....	5-12
5.4.4	DeviceNet .....	5-15
5.5	Electrical Circuits.....	5-15
5.5.1	E-stop Circuits .....	5-15
5.5.2	Control Power On Circuits.....	5-17
5.5.3	No Faults Relay Circuits.....	5-17
5.5.4	Motor Circuits.....	5-18
5.5.4.1	Single Speed Motor.....	5-18
5.5.4.2	Dual Speed Motor.....	5-18
5.5.4.3	Dual Speed Reversing Motor.....	5-18
5.5.4.4	Single Motor VFD controlled .....	5-21
5.5.4.5	Dual Motor VFD controlled.....	5-21
5.5.5	Interlock Circuits .....	5-23
5.5.5.1	Remote Panel Zones Interlocks .....	5-23
5.5.5.2	Zone to Zone Interlocks .....	5-23
5.5.5.3	Loading Station Interlocks .....	5-25
5.5.5.4	Unloading Station Interlocks .....	5-25
5.5.5.5	Mezzanine to Floor Vertical Belt Lift Interlocks.....	5-25
5.6	VFD Parameters .....	5-26
5.6.1	Vertical Belt Lifts .....	5-26
5.6.2	Roller Conveyor.....	5-26
5.6.3	Turn Table & Swing Table .....	5-27
5.6.4	Stacker and Destacker .....	5-27
5.6.5	Scissors Lift .....	5-27
<b>SECTION 6 ELECTRICAL OPERATION .....</b>		
6.1	Starting Up The System .....	6-1
6.2	Shutting Down The System .....	6-1
6.3	Panel Operating Controls and Indicating Instruments.....	6-2
6.3.1	Central & Remote Control Panels.....	6-2
6.3.2	Drive Panel.....	6-3
6.4	Selecting Modes of Operation for Conveyors .....	6-3
6.4.1	Auto Mode .....	6-3
6.4.2	Manual Mode .....	6-3
6.4.3	No Mode .....	6-4
6.5	Operator Station Controls .....	6-4
6.6	PanelView .....	6-8

## Table of Contents (Continued)

Section	Description	Page
<b>SECTION 6 ELECTRICAL OPERATION (Continued) .....</b>		
6.6.1 Conveyor System PanelView .....	6-8	
6.6.2 Vertical Belt Lift PanelView .....	6-23	
<b>SECTION 7 PLC SOFTWARE DESCRIPTION .....</b>		7-1
7.1 PLC Program Files.....	7-1	
7.1.1 Code Structure .....	7-2	
7.2 PLC Memory Map .....	7-3	
7.3 Processor Configuration.....	7-5	
7.4 Symbols .....	7-5	
7.5 Conveyor Segments' PLC Logic .....	7-7	
7.5.1 Accumulator Belt.....	7-7	
7.5.2 Idle Roll Bed Conveyor .....	7-7	
7.5.2.1 Idle Roller (non VFD).....	7-7	
7.5.2.2 Idle Roller (VFD).....	7-8	
7.5.3 Turn/Swing Table .....	7-8	
7.5.4 Cam Lift.....	7-10	
7.5.4.1 Cam Lift (Holding only) .....	7-10	
7.5.4.2 Cam Lift (Loading – non VFD) .....	7-10	
7.5.4.3 Cam Lift (Loading – VFD) .....	7-11	
7.5.4.4 Cam Lift (Unload – non VFD).....	7-12	
7.5.4.5 Cam Lift (Unload – VFD).....	7-12	
7.5.5 Crossbelt Transfer .....	7-13	
7.5.6 Scissors Lift .....	7-13	
7.5.7 Stacker.....	7-15	
7.5.8 Destacker.....	7-16	
7.5.9 Vertical Belt Lift.....	7-18	
7.6 Fault Logic Structure .....	7-20	
7.7 PMCS.....	7-29	
7.8 FIFO Control.....	7-30	
7.9 PanelView Logic Structure .....	7-31	
<b>SECTION 8 ELECTRICAL SYSTEM TROUBLESHOOTING .....</b>		8-1
<b>SECTION 9 MAINTENANCE .....</b>		9-1

## LIST OF TABLES

Number	Description	Page
4-1	Accumulating Belt Conveyor – Control Device Description .....	4-1
4-2	Cam Lift and Cross Belt - Control Device Description.....	4-3
4-3	Destacker - Control Device Description .....	4-6
4-4	Idle Roll Bed Conveyor - Control Device Description.....	4-12
4-5	Load Transfer Conveyor - Control Device Description .....	4-13
4-6	Scissors Lift - Control Device Description.....	4-15
4-7	Stacker - Control Device Description .....	4-19
4-8	Swing Table - Control Device Description.....	4-23
4-9	Turn Table - Control Device Description .....	4-24
4-10	Vertical Belt Lift - Control Device Description .....	4-27
5-1	Typical A-B 1305 VFD Parameter Settings .....	5-28
5-2	Typical A-B 1336 VFD Parameter Settings .....	5-29
5-3	Typical Manufacturer's Suggested Speed, Acceleration and Deceleration Settings for Various VFD Controlled Conveyors .....	5-30
6-1	Central & Remote Panel Operating Controls and Indicating Instruments.....	6-2
6-2	Drive Panel Operating Controls.....	6-3
6-3	General Controls Found at Every Pushbutton Station .....	6-4
6-4	Controls Found at Accumulating Belt Conveyor Stations.....	6-4
6-5	Controls Found at Cam Lift Conveyor Stations .....	6-5
6-6	Controls Found at Wait Station Lift Conveyor Stations.....	6-5
6-7	Controls Found at Roller Conveyor Stations .....	6-5
6-8	Controls Found at Turn Table/Swing Table Conveyor Stations.....	6-6
6-9	Controls Found at Load/Unload Transfer Conveyor Stations .....	6-6
6-10	Controls Found at Scissors Lift Conveyor Stations.....	6-6
6-11	Controls Found at Vertical Belt Lift Conveyor Stations .....	6-7
6-12	Controls Found at Stacker/Destacker Conveyor Stations.....	6-7
6-13	Interlocks – From Floor Conveyor to Lift .....	6-29
6-14	Interlocks – From Lift to Floor Conveyor .....	6-29

## 1 Introduction

### General

This manual contains the electrical system description and operation instructions for the Eisenmann GMT800 body shop skid conveyor system. Eisenmann Corporation, Crystal Lake, Illinois, manufactured this conveyor system.

### Purpose of Conveyor System

The purpose of the conveyor system is to deliver units at the specified rate between body shop tooling zones and the ELPO system.

### Related Publications

Other publications include the following:

- Conveyor system mechanical manual
- Conveyor electrical drawings
- Conveyor PLC program printouts

### How To Use This Manual

This manual is arranged and subdivided by sections. The Table of Contents at the beginning of this manual is a guide to the main subject of each section. Further listings identify the topics within each section and the page numbers of which the topic can be found.

For the convenience of locating specific tables and figures, a List of Tables and List of Illustrations are included in the Table of Contents. References include a table or figure number, description, and the page number on which the table or figure can be found. All tables and figures are numbered sequentially within each section.
